Preserve. Protect. Educate.

## 19TH ANNUAL FOLKLIFE FESTIVAL

Local drummers Delroy "Ital" Anthony (left) and Wanda Burgos (right) perform with Olabayo.

The Annual Folklife Festival, now in its 19th year, was once again hosted by VI National Park in celebration of Black History Month. The event was held at the Annaberg Sugar Mill Ruins February 25–27 and featured local radio personality Irvin "Brownie" Brown as the MC, storytelling by numerous local culture bearers, entertainment by Coco and the Sunshine Band, and an original presentation by local musician Chester "The Mighty Groover" Brady. The main presentation was given by Nigerian Olabayo Olandiyi, who entertained the crowd with rhythmic drumming and traditional storytelling.

Over one thousand visitors attended the 3-day festival celebrating the theme of "Open Mouth and Story Jump Out". The guest speakers included Dr. Gilbert Sprauve, Faye Fredricks, and Dr. Eddie Bruce. They presented various historical topics to the enthusiastic crowds, touching on the history of storytelling, old time games, and oral tradition. They also spoke *old time knowledge* that has been nearly lost due to a lack of practice and passing it along down through the generations. A local cook first showed the crowd of enthralled students how to clean the local "Pargie Fish" – a technique that youngsters of the past would have learned as they grew up. The removal of the "pen," a bone in the fish's belly, was shown to the crowd. The bone must be removed prior to cooking in order to preserve the delicate flavor of the fish. The culture bearer then showed the local way to clean and prepare conch and other marine delicacies. Ranger Denise Georges, organizer of the annual festival, reminded the crowd that traditions and practices like the ones shown should continue to be cherished and passed along to future generations.

Local craft and food vendors were on hand, displaying their cultural wares and local delicacies. Charles "Calla" Mathias led festival-goers on a tour of his lush garden, featuring recently purchased signs noting the scientific and local names of the numerous plants. The daily festivities ended with the elaborate storytelling of Olabayo, which took festival-goers on a mystical journey as he told humorous and frightening stories while dressed in a homemade costume of local bushes and a cloak. Storytelling is one of the few ways Africans were able to transport their traditions and practices on their journey to the Caribbean as slaves. Storytelling is a rich basis of an ethnic group's ritual gathering. Festival goers will now have their own stories to pass along in oral tradition. The final day of the festival allowed visitors one last chance to view the presenters and Olabayo's storytelling during an evening program. The moonlight added a captivating ambiance to the already mystical presentation. 🌿

## Tidings Notes

### SCA Summer Trail Crew Opportunities

Friends is seeking Virgin Islands students to participate in a month-long summer trail crew program in partnership with the Student Conservation Association. This is a one-of-a-kind opportunity to live and work in Virgin Islands National Park on St. John maintaining hiking trails. Crew positions (ages 16–20) and crew leader positions (ages 21–25) are available. Call Audrey for more information.

### 2010 Scholarship Program

The Friends' Annual Scholarship Program is once again being offered to Virgin Islanders studying at the university level in fields related to marine biology or other natural sciences. Friends is also offering a scholarship for children of VINP staff at the university level. Priority will be given to students pursuing a degree related to the natural sciences. Both scholarships will be in the amount of \$1,000 per academic year and applications are due by April 24th. Please contact Audrey for an application and more information on eligibility requirements.

### Summer Eco-Camps!

**ATTENTION PARENTS** – Summer Eco-Camps are almost here! The Friends is sponsoring four 3-day/2-night eco-camps for children ages 8–13, July 12th–24th, and one 5-day/4-night Science Camp for 13–16 year olds, July 26th–30th. The newest addition this year is a 4 day/2 night Ranger in Training Camp, July 6th–9th, that is featured on page 7. These camps, which take place at VIERS in Lameshur Bay, will introduce kids to the wonders of our diverse island ecosystems. Remember, Eco-Camps are free of charge to U.S. Virgin Islands students. Please call VIERS to register: (340)776-6721. 🌿

Mark Hardgrove

## MESSAGE FROM THE SUPERINTENDENT

BY MARK HARDGROVE

This year the NPS invested over eleven million dollars in the Virgin Islands economy through the payment of salaries, contracts, supplies, materials and utilities.

This does not include the positive impact that having five NPS units, three of which are in St. Croix, has on the local economy. Next year we will be starting a new program working with our cruise ship visitors who will be able to sign up for “voluntourism” day trips, both full and half day. Visitors will sign up on board and then upon arrival in St. Thomas be transported to Hassel Island and St. John to help preserve park resources, clean park beaches, maintain trails, remove vegetation, and stabilize cultural landscapes and historic structures. It is expected that we will have crews of 35, four days per week, preserving park resources.

This new visitor experience will provide the much needed manpower to maintain the park’s cultural and natural resources and visitor facilities. In most cases these “voluntourism” crews will be transported by local taxis, making a positive impact on the economy. Shopping and lunch time will also be included. This new program will also shift some visitor use away from Trunk Bay and other popular beaches, thereby providing time to visit downtown Cruz Bay before returning to their cruise ship.

The NPS is proud to be included in the planning opportunities working along with the Port Authority, Department of Planning and Natural Resources, Parks and Recreation, and the Island Administrator to improve recreational facilities at the ball field for our youth and adults, plan for parking and traffic flow, visitor access for boaters, access for boat trailers, dredging partnerships, and other proposed improvements. This partnership will make community usage of the facilities in and around the Park friendlier for visitors and locals alike.

We are also very proud and grateful for our partnership with the Friends – every day you make us better!

Thank You! 🌿

## FRIENDS' 2010 ANNUAL MEETING

### Business Accomplished at the Annual Meeting

Olasee Davis speaks at the 2010 Annual Meeting.

On January 24th, about 150 Friends members and supporters gathered for the Friends' 2010 Annual Meeting at Cinnamon Bay to hear addresses by this year's keynote speaker, noted Ecologist and Environmentalist, Olasee Davis, Friends President Joe Kessler, and VINP Superintendent Mark Hardgrove.

Attendees were particularly moved by Olasee's address in which he noted, among many other things, that during his time in the Virgin Islands he has seen many negative changes to the environment that the government could have prevented. Olasee reflected on the teachings of the late George Seaman who was disappointed with the government's lack of attention to the preservation of the natural environment. Olasee told the crowd that if Mr. Seaman were alive today he would be very pleased that the Park has the Friends as their philanthropic partner.

### Friends of Virgin Islands National Park Update

Friends' president Joe Kessler gave an overview of the Friends accomplishments and highlights of this past year: completion of the Resource Access Mooring Project, construction of the first phase of the Accessible Trails Project at the Francis Bay Trail, and the opening and extensive use of the Philanthropy in the National Parks exhibit next to the Visitor Center. He noted that the Friends are most proud of the program highlights, which included hosting a number of successful events and providing funding for over 2,000 kids to explore the Park on ranger-led field trips and/or overnight summer eco-camps at VIERS.

Joe discussed the Friends' goals for 2010: meeting an ambitious annual budget goal of more than \$900,000 to support (in addition to our regular programs) the replacement of the picnic tables and grills at Francis Bay and Little Lameshur, installation of underwater cameras under the dock at VIERS for educational programs, support of a film that highlights the research undertaken in VINP, and providing support to the Park's historical archives.

### State of the Park Address

VINP Superintendent Mark Hardgrove recapped the Park's recent accomplishments, the most visible of which is road improvements

## FRIENDS 6TH ANNUAL GALA

2010 Gala goers dance the night away.

The 6th Annual Gala, "Feeling Good While Doing Good," held at Janet and Martin Marshal's villa, *A la Mer*, was a great success! Music was provided by Paradise People, who opened the evening with mellow jazz and segued into dance music later in the evening.

The event was catered once again by Mathayom Private Chefs, with a unique blend of foods. With raffle gifts donated by 31 generous individuals and local businesses the big event of the evening, however, was the announcement of a raffle for a long weekend stay at the Marshal's beautiful villa. Mathayom was the lucky winner of the weekend.

Sponsors included Diageo VI and Bellows, who generously donated the bar. Merchants Market and S&P Fish donated part of the food for the evening. With two full bars available, wine and champagne were the drinks of choice for the evening! We thank all our donors for their gracious contributions.

Planning started months in advance with the strong support of a committee who worked tirelessly on all aspects of the event. At least 30 volunteers worked to serve, greet, sell raffle tickets and tend bar to make the evening the festive occasion that it was. Thank you for all your hard work.

As one of the year's biggest fund-raisers the event netted a total of \$35,000, which also includes proceeds from the on-line auction. Many are saying that *A la Mer* would be great for next year, and we're taking suggestions, so let us know!

Friends staff at Gala.

## VOLUNTEERING HIGHLIGHTS BY JEFF CHABOT, VOLUNTEER COORDINATOR

New expanded volunteer site.

A solid number of volunteers continue to show up to participate in the Friends of the VINP walk-up volunteer program. They find it rewarding to give back to the community and participate in projects to preserve the Park land and the sites of ruins. Being able to view 400-year-old historic sites of colonial sugar mills, processing factories, and the period's Great Houses is certainly exciting, but to be part of their uncovering, many which have not been seen for 50 or 60 years, makes the work even more

rewarding. The excitement that evolves from participation creates a club-like atmosphere that emanates from each group, all sharing a common goal, which is a great feeling for the individual and group as a whole.

This season the volunteers began the task of clearing fourteen of the Park's trail and road vistas which used to be the "pride and joy" of residents and visitors alike. Without this regular maintenance those vistas all slowly disappeared, some completely, though not without being remembered. So was born a new seasonal crusade to re-establish those key viewing points around the island. Everyone just has to say "WOW" when they come upon one of the vistas cleared by volunteers who participate in the volunteer program that runs from November thru April.

Other highlights of the season were the participation of the American Hiking Society and The Sierra Club helping with two major trail projects. The AHS provided the manual power to create the new Jumbie Trail, and the Sierra Club worked on erosion prevention features on the upper Reef Bay Trail and re-gravelled the first 1,000 ft. of the trail. This makes it much more sustainable. Other groups are still scheduled to arrive this season, using the new and improved Volunteer Group Base Camp Site at Cinnamon Bay Campground. They, too, will be working for the most part on trail erosion projects, which will be our focus for the next couple of years due to the poor condition of the trails.

Please contact the Friends or Jeff Chabot at [jeffchabot@aol.com](mailto:jeffchabot@aol.com) if you would like to help or know of any groups that might want to lend a hand. 🌿

Can you name this newly cleared Park vista?

## FROM THE PAGES OF THE ARCHEOLOGY BLOG...

BY KARSON WINSLOW, 2010 INTERN

Interns (left to right) Marlece Reed, Karson Winslow, and Lauren Riser collect field data.

A gentleman asked me the other day why I was interning with the National Park Service on St. John. He thought that with the bad economy, this had to be the reason why I didn't have a "real job." Either that or else I wasn't sure what I wanted to do with my life. I responded with the exact opposite. I know exactly what I want to do in my life, and right now this is it. I joined as an intern and volunteer purely because I have a strong desire to be in the field of archaeology. In the field now for a little over five years, I have had the opportunity to work in some really great places and with very knowledgeable and amazing people. St. John has been no exception.

I went to school in California at UC Santa Cruz, receiving a BA in Anthropology (2005). I continued with my education and moved to South Australia to attend Flinders University for graduate studies focusing on Maritime Archaeology (2007). After university, I worked in a number of places including Tasmania; St. Augustine, Florida; Galveston, Texas, and California. This helped me focus on a region I believe will best apply to my studies and experiences.

Being an archaeologist, the system is similar and relatively universal in the different locations where one works, but each individual area brings its own cultural identity. For this reason I choose to explore the past as well as explore the unique entities most people might not even know exist.

I will only be on St. John for a short while, though I intend to return and continue working and volunteering on the island in the near future. Historically, the Caribbean is a "Colonial Melting Pot". Many European powers utilized these waters and these islands, leaving behind important history that belongs to all of those nations. There is also the history of the people who originally inhabited the islands.

Days are spent at Cinnamon Bay working in the archaeology lab. Work out there consists of informing visitors about the history of the area and explaining the purpose and focus of the work we do. We are also working on cataloguing artifacts from the excavation at Cinnamon Bay that was completed at the ceremonial grounds of the site. We are also washing and sorting artifacts from a current re-burial project the VINP is presently undertaking. When not in the lab, we are in the field recording the remains of known sites on and around the island or gathering historic data on field artifacts. One particular project entails the recording of the exact measurements of the one surviving historic marine iron bollard at Creque Marine on Hassel Island. We are doing this so that identical bollards can be reproduced as part of a park-funded project that is aimed at providing safe docking for visitors, while maintaining the historic scene.

This project would not happen without the generous funding from the Friends. I would just like to say a quick thank you to them. Without their funding it would not be possible for the other interns and myself to be here. I very much appreciate their support and generous donations towards the Park. 🌿

## 2010 SEMINAR SERIES

The new look of the Friends Seminar brochure wasn't the only change in this popular series for this year. Friends' members were treated to a wider variety and longer schedule than ever before. This is thanks to the stimulating programs offered by the many volunteer instructors, who helped to make this year's seminar line-up new, exciting, and educational. Cornerstone seminars were still well attended, but a focus on the history of the Park and St. John was touched on by more than one seminar.

Participants in the history-focused seminars experienced various facets of the history of the Virgin Islands and the Park. Guy Benjamin told stories of days gone by, while Ken Wild guided a hike and kayak trip to Hassel Island – recently opened for visitation. Further submersion into Virgin Islands history continued with the well-attended NPS Archive tour and ended with a historical tour of the Caneel Bay Plantation led by Chuck Pishko. We are always looking for ideas for new seminars, so be sure to give us your suggestions for next year.

The Seminar Series runs until April 17th and seminars are filling up fast. Remember discounted rates are available for Friends' members and kids 12 and under receive 50% off all seminars, with the exception of boat trips. Visit [www.friendsvinp.org/seminars](http://www.friendsvinp.org/seminars) for a seminar schedule or call (340)779-4940 to register today. 🌿

## SKIP PARTNERSHIP

BY LAUREL BRANNICK, EDUCATION SPECIALIST RANGER

The Friend's SKIP (School Kids in the Park) project has continued to be instrumental in providing teachers with funding for trips into the Park. In addition to the many classes from St. John, an increasing number of classes from St. Thomas have been taking advantage of the program and the opportunity to visit St. John and Virgin Islands National Park. With approximately 56% of St. John being protected the Park is really an outdoor class room. The teachers and students from St. Thomas enjoyed the experiences they have had while visiting the Park. Friends of VINP understands the importance of connecting students with the past by facilitating visits to the Park's many undeveloped areas and cultural resources. These opportunities are what the SKIP program provides.

One of the recent SKIP trips involved the 1st, 2nd and 3rd graders from the St. Thomas Montessori School. They visited the Cinnamon Bay Nature Loop and Annaberg Ruins. The students got the chance to see how Virgin Islanders of the past met their basic needs by living off the land. This helped them realize that we still have some things in common with the past inhabitants of post-plantation days. One student connected the past with the current use of plants for medicine and bush tea.

Another memorable trip this year was the 3rd grade class from Antilles School, who were learning about the pre-Columbian people of the Virgin Islands. After creating replicas of Taino Indian villages at school they visited the Cinnamon Bay archaeology lab and saw artifacts that have been recovered from Taino sites. Ken Wild, the Park's archeologist, was there to answer the students' many questions. Much of the current information on the Tainos is so new that it is not yet in books. This makes the

Antillies students in the Archeology Lab.

archaeology lab a great resource for both teachers and students. After the trip, their teacher, Mrs. Riggie, wrote to say that the students had a wonderful time and talked about the trip all day.

This year we also made contact with the Wesleyan Academy, a school previously unaware of the SKIP program. The 8th graders visited the Park to participate in the Junior Ranger program. While they were here they took a tour of the north shore of the Park and completed the activities in the Junior Ranger Book. These activities covered topics like bay rum collection, charcoal pits, basket making, farming and fishing. They were so pleased with the program and their Park experience that they raised money to visit Hassel Island. Ken Wild and his interns gave them an informative history lesson on the significance of Hassel Island. The students' enthusiasm shows the importance and success of the Friends' SKIP program. 🌿

## FRIENDS' 2010 ANNUAL MEETING CONTINUED FROM PAGE 3

to North Shore Road. Improvements will address issues starting in Cruz Bay and will end at the Kings Hill intersection to Centerline Road. The superintendent's address also included information on the Park's "voluntourism" program. The program will work with cruise ship passengers to entice them to spend time volunteering on Park trails or doing maintenance on ruin sites. He also touched on work the Park is doing to create a north shore shuttle service that will ease the flow of traffic. Discussion with the local taxi drivers is still underway to address the details, but shuttle service is imminent.

**Paula and Kent Savel** were announced as the Park's Volunteers of the Year. They were instrumental in creating the Friends' Annaberg Docent program, and also spend days volunteering in the visitor center and as substitute guides for the Reef Bay Hike. Mark also expressed his gratitude for the work of the Friends and their support of the Park. He noted that without the Friends the Park would be a much different place.

### Friends Awards

Tribute was paid to **Dave Thompson** by naming him the Friends' Volunteer of the Year. Dave was selected for his leadership and exceptional efforts in leading the construction of the first phase of the Accessible Trails Project at Francis Bay. Dave worked each day to oversee its accurate construction.

This year, VINP Marine Biologist **Jeff Miller** was awarded the Park Partnership Award for embodying the spirit of partnership and collaboration that is essential to the relationship between VI National Park and the Friends. Jeff has been instrumental in the success of the Beach-to-Beach Power Swim and is a technical advisor on our projects that educate people about marine resource issues. We truly appreciate Jeff and his work in the Park. 🌿

## RANGER IN TRAINING CAMP

BY JESSICA HORNBECK

Ever wondered what it takes to be a Ranger? This year's new Ranger-in-Training (RIT) camp was created to address this question. RIT will expand on the existing concepts of the Friends sponsored Eco and Science Camps hosted at Virgin Islands Environmental Resource Station (VIERS) by giving high school students who are interested in science and interpretation/outreach education careers an opportunity to engage in everyday activities of a Park Ranger. Many students learn by "doing" and by gaining personal experiences which ultimately lead to career interests. This camp will incorporate this learning style to promote career development by building close relationships with VINP staff as they give students real-life career experiences and training. During the camp, students will be shadowing and/or assisting rangers with the professional activities they frequently perform. Topics of instruction will include: hiker and island orientation, astronomy, field journaling and scientific data collection techniques, cultural history and archeological field techniques.

The camp will take place within Virgin Islands National Park (VINP) and VIERS on St. John, located in Lameshur Bay. VIERS provides a relaxed learning environment and an opportunity for attendees to be immersed in a remote natural setting within VINP boundaries, allowing access to many of nature's teaching aids which VINP has to offer. This will provide a deeper understanding of the natural world and enhance resource stewardship by strengthening the bond between the students, their island, and VINP.

Funding for this camp was awarded to VINP as part of a National Park Foundation "Small Grant." This funding will allow for 10-12 attendees to participate in the camp. Due to the nature of the grant and limited space, first preference will be given to local high school students who are close to graduation and campers not attending other VIERS Camps. RIT will take place July 6-9, 2010 and consist of a 1 day-only camp followed by 2 overnight days, and one final half day of camp.

For more information or to apply for this camp please contact Jessica Hornbeck at VINP or VIERS directly at (340)776-6201. You can also download an application at [www.islands.org/VIERS](http://www.islands.org/VIERS). 🌿

## NEW DEVELOPMENT DIRECTOR

Heather Ruhsam.

Changes in Development Director are in the winds again. After completing a year in the position Noreen Cavanaugh has decided to return to her native Massachusetts. Noreen was instrumental in developing a number of partnerships with local businesses and hotels – one of which is our dynamic partnership with VI Ecotours who now donate funds for every visitor that participates in their kayak tours in and around the Park. She will also be remembered for organizing our recent gala and initiating a very successful online auction. We wish to thank Noreen for her service to the Friends and wish the best of luck in her future endeavours.

While we are sorry to see Noreen go, we are very excited to announce that our new Development Director will be Heather Ruhsam. Heather is not a stranger to St. John, having moved here as a teenager. Despite some stints on the mainland to go to university and gain work experience, she calls St. John home. Back most recently since late 2007, Heather brings her local knowledge and energetic attitude as well as a degree in International Studies from the University of North Carolina at Chapel Hill to the Development Director position. Her background in event planning, marketing, operations and business management will serve her well in her new duties.

Public outreach and volunteerism are not new to Heather; whether it is serving as a captain for the Leukemia and Lymphoma Society in Los Angeles, volunteering at St. John Animal Care Center Events, being a reader and board member for the Elaine Sprauve Library or organizing benefit events, you can find her involved in her community.

When interviewed about her recent appointment to the position Heather stated, "I am very excited to work with the Friends – they are a great organization and it is a wonderful opportunity to combine my skill set and love of St. John and our community!" She is enthusiastic about rising to the challenges of fundraising in this economy and is eager to assist the Friends in moving forward in their mission. We are pleased to welcome Heather to the Friends team! 🌿

## SAVE THE DATE!

■ **2010 Beach-to-Beach Power Swim:** The 7th annual Memorial Day weekend Beach-to-Beach Power Swim will be held on May 30, 2010. Join us for this challenging, fun, open-water swim in the pristine and protected waters of VI National Park.

Visit [www.friendsvinp.org/swim](http://www.friendsvinp.org/swim) for complete details and course descriptions. If you are not a swimmer, please help as a volunteer. We need nearly 80 volunteers to make this a safe and successful event.

■ **Carabana Ensemble Cultural Theater:** This year, the theater features **Benji**, a monodrama that chronicles the life of Guy Benjamin, a St. John icon, and his childhood days leading up to his life as St. John's most legendary teacher. The production will show every Thursday evening at the Cinnamon Bay Amphitheater at 7:30 pm until April 29th.

As always, admission is free! 🌿

Joe Kessler

## PRESIDENT'S MESSAGE

BY JOE KESSLER

Over the years the Friends has increased our attention to island youth. Building on a modest, but important and very popular Eco-camp program we now have programs that target school children throughout the year. Last year we had some significant accomplishments and we are poised to do even more in 2010.

Helping nurture the next generation of conservation citizens is an important part of our mandate. The children of the Virgin Islands are going to be the next environmental stewards of these islands and of Virgin Islands National Park. We feel that it is incumbent upon the Friends, and frankly all of us, to ensure that youth are prepared for this responsibility.

Our programs for youth include:

- Eco-camps provide a 3-day, 2 night experience for children, ages 8–12, to stay within the Park at VIERS to learn about marine and terrestrial eco-systems. Last year we introduced a 5-day/4 night Science camp for older children, ages 13–15. This year we will also offer a 4-day, 2 night Ranger-in-Training camp also for older children.
- School Kids in the Park (SKIP) is a two-fold program: it provides small grants to teachers, enabling them to do projects and activities that use the Park as an educational resource, and enables field trips to the Park for ranger-led activities.
- The Earth Day Environmental Fair provides a fun environmental learning experience. This year we will add a Reef Fest as a marine component to the festivities. The fair is attended by virtually all of St. John's school children.
- The Summer Trail Crews program brings teenagers from the Virgin Islands and the mainland U.S. together to repair 6–10 miles of Park trails each summer. The crew members learn technical, leadership, team-building and cross-cultural life skills.
- The Scholarship program provides scholarships to students studying natural sciences at the university level.

These projects are only possible because of your support. Together we can make a difference and ensure thoughtful and responsible stewardship of this beautiful island and awe-inspiring national park. To continue this good work I hope that Virgin Islands National Park and the Friends remain one of your philanthropic priorities.

I look forward to seeing you in the Park. 🌿

## upcoming events!

### ■ Earth Day 40th Anniversary Celebrations:

Friends is celebrating the 40th Anniversary of Earth Day with a week of earth-friendly fun. Events will culminate with the 5th annual Earth Day Environmental Fair on April 23rd at the National Park ball field in Cruz Bay starting at 9:00am and ending at 2:00pm. For the past four years, this event has created environmental awareness among young children. This year an aquatic component will be added on April 24th for the 2nd Annual St. Thomas/St. John Reef Fest at Hawksnest Beach, starting at noon and ending at 5:00pm. Activities include a guided snorkel or kayak tour, identifying reef fish, participating in hands on educational exhibits, a sandcastle building contest, and much more.

Join us to celebrate Mother Earth on our semi-annual beach and trail cleanup on Sunday, April 25th and adopt a beach or trail, or help on the day of the cleanup. Contact Audrey for more information.
